Reliability & Safety: Hydraulic Retarder; Ceramic pull clutch; Front, middle and rear hydropneumatic suspensions; High strength wear-resistant U-shaped body; New generation axle of the axle package shaft; Aluminum alloy brake air reservoir; Thermal barrier exhaust pipe.

+

Our product is equipped with a structurally optimized full penetration welded cross-section frame, a light and wear-resistant cargo compartment, customized high-load axles and gearboxes for mines, which can improve the lifespan and load capacity of the truck.

The front suspension is a five-link hydro-pneumatic spring rigid axle suspension, the middle and rear suspension is a parallel-shaft pneumatic suspension.
